4. Improved level of achievement from the last cycle

4. مستوى التحسن في الإنجاز من الدورة السابقة

(based on previous recommendations, if any)	بناءً على التوصيات السابقة. إن وجدت

Recommendation - التوصيات	الإجراءات المتخذة - Actions Taken	Results - النتائج
1. Add more reference books to university library 2. Add questions bank in the Moodle	1. Continued efforts to expand genetics reference materials; explored digital resources when physical books unavailable 2. Developed and implemented additional practice questions and self-assessment tools in the learning management system	1. Maintained strong performance above 70% target despite slight decline from 83.3% to 81.74% average, attributed to weaker student preparedness 2. Enhanced student engagement and self-directed learning opportunities, though cohort ability differences impacted overall performance

5. Explanation for level of achievement below target (if the average is less than 70%):

5. تفسير لمستوى الإنجاز دون المستهدف (في حال كان المتوسط أقل من ٧٠٪):

N/A - Both sections significantly exceed the 70% target (Section 1: 82.07%, Section 2: 81.40%

6. Instructor recommendations to resolve low achievement (if any):

6. توصيات المدرس لحل مشكلة الإنجاز/التحصيل المنخفض (إن وُجدت):

N/A - Achievement remains well above target. Continue current effective teaching strategies while providing additional support for students with weaker foundational knowledge in biology and molecular concepts

7. Overall instructor view about the course and the plans to improve the course:

 وجهة نظر المدرس الشاملة حول المقرر والخطط لتحسينية:

Genetics continues to demonstrate strong student achievement with both sections substantially exceeding the 70% target. While there was a slight decline from the previous cycle (83.3% to 81.74% average), this reflects the challenges of teaching a student cohort with weaker foundational knowledge in basic biology and molecular concepts compared to previous highly prepared students.
