Dear Aisha;
I'm well, I hope you are well too
No, you do not need to memorize examples
Goodluck

Subject: Toxicology

Dear Dr Einas,
Good morning, hope this finds you doing well,
I am sending you to ask few questions regarding Toxicology,
I would like to know whether we are required to memorize the examples for "biological target" mentioned between brackets in slide 3 of (mechanism of action of a toxicant at Molecular level) ?
And the examples mentioned in the points of "mechanism of action of toxicants" ?
Thank you,
Regards , Aisha
