			95				

## PEER OBSERVATION OF TEACHING

### Feedback to the Instructor

1. The following were identified as areas of strength or good practice.

Flow of the lecture

Teaching practice and methods were controlled to fit the lecture and the students' limits

Communication and responding to students' queries was good in away that helped students enforce their learning

The use of open source application allows students to use the same technology at home for free

2. The following were identified as areas for potential improvement.

The subject is very technical a lab technician should be employed to help students with coding.

More study material's and resources will help students further fostering their subject knowledge

Recorded videos on how to use client and server side technologies under apache platform will further help students learning
